

## THE FIRST GUIDE IN THE FINANCIAL LABIRINTH

Usually the financial facilities, loans, grants are managed by ministerial departments and for the small and medium sized municipalities is not easy to have access to the information because are less affluent of big cities. This project aims to envisage the exploration of the possible use of the grants and loans available and to support all type of municipalities to increase their free participation for the development of municipal infrastructures and the provision of High Quality Public Services envisaged for the environment and protection, public transport, urban development and reduction of pollution, recycling of the solid waste creating new resource, using renewable energy and distribution of new energy, wastewater treatment and supply, hospitals and health infrastructures, tourism hub and infrastructures, generating new activities with urban and land rehabilitation projects for the occupation of poor communities, etc.

The CCIP designs many tailor-made trainings in all fields related to the public affairs and has designed especially for the Mayors and public decision makers a **Guide Training Course** throughout the grants and loans now available. The trainers are efficient professionals with twenty years of experience on international financial projects for the cooperation between public and private bodies.

### **The key objectives are:**

- Enhance the efficiency of public infrastructures
- Reduce regional disparities
- Increase and deliver high quality of public services
- Strengthen environment and ecological protection for the benefit of citizen
- Create occupation

Our training course has been primarily designed to assist for the Mayors and public decision makers charged to develop the projects to improve their understanding of the key issues and procedures involved in the preparation of the demand of loans and grants to the financial institution.

The course is designed to be easily explained and tip only on the practice so that participants are now able to understand the various steps necessary to submit applications for funding. The course goes straight to the final point and avoid any loss of time. We can say that the course is created especially for politicians and managers.

**The training is the first and inedited initiative and can answers immediately to the following questions:**

What are the lending facilities for the financial aids to the Municipalities and Districts?

What types of project are supported ?

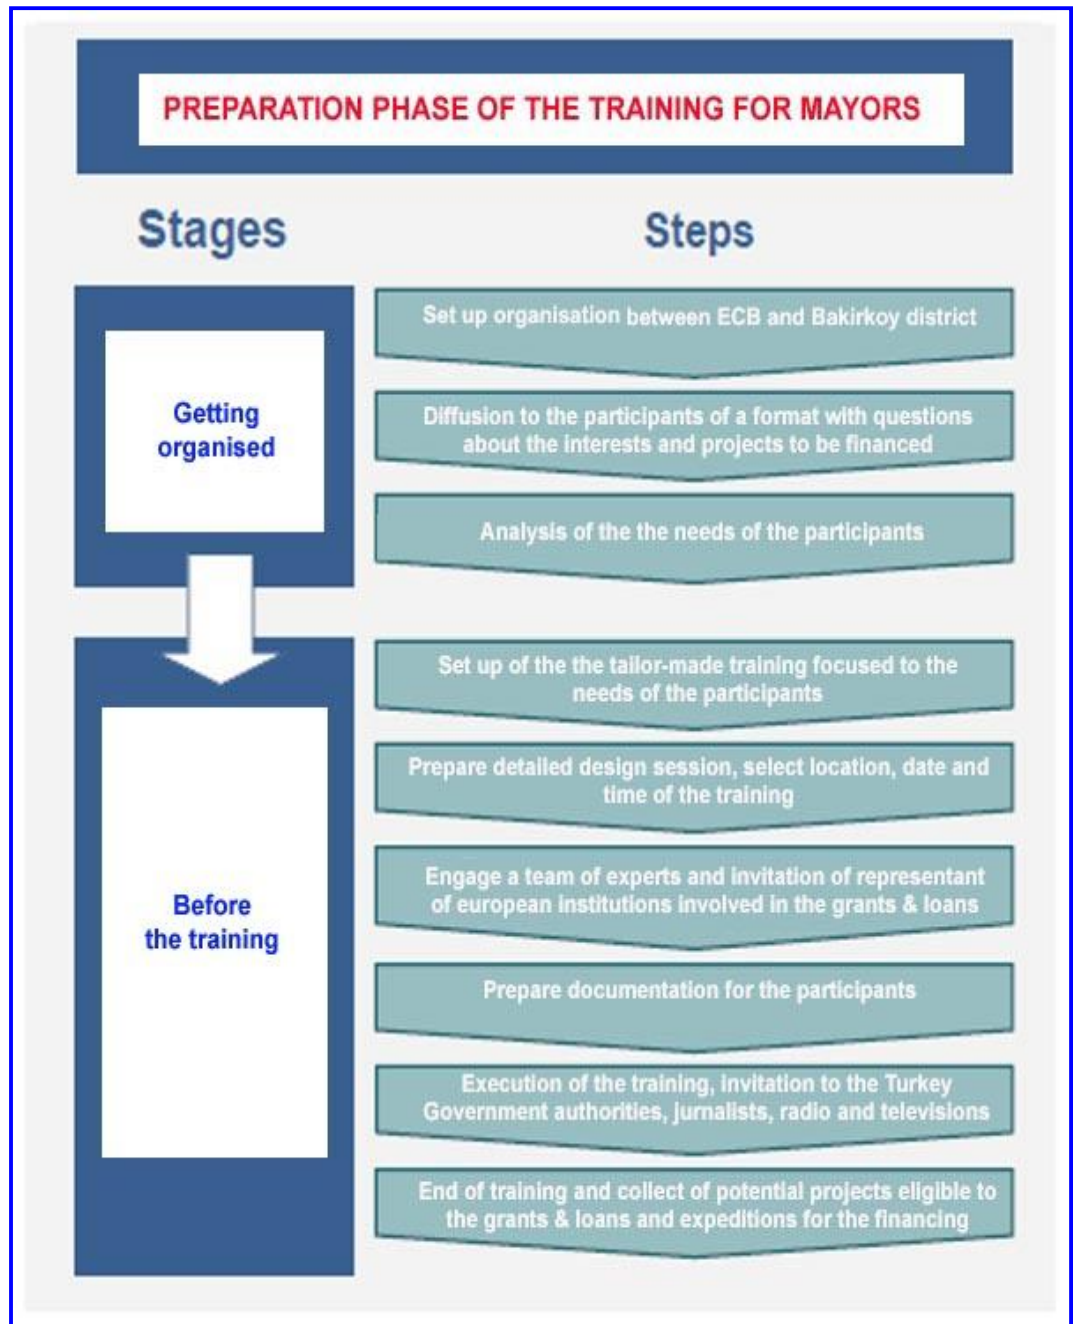

What is the procedure for obtaining a grant or a loan?

What are the grants and loans conditions and disbursement?

How long does the grants or loans procedures take from application to disbursement?

When the projects are accepted, what happens next?

Can the loans or grants be combined with financial aids from other banks or national financial aid?
